Education

California State University, Long Beach — Long Beach, CA

B.S. Computer Science | Expected May 2028

GPA: 3.7/4.0

Skills

Languages: C++, JavaScript, Python, SQL, HTML/CSS

Frameworks & Libraries: React, Express.js, Node.js

Tools & Technologies: Git, Docker, Linux/Unix, Vercel, Render, VS Code, Visual Studio, WordPress, Figma

Concepts: REST APIs, Full-Stack Development, Object-Oriented Programming, Data Structures & Algorithms

Languages Spoken: English, Japanese

Projects

AI-Powered Study Assistant | React, Express.js, LLM APIs, Docker

Spring 2026

- Built and deployed a full-stack AI web app that generates summaries, flashcards, and quizzes from study notes.
- Developed a React frontend with markdown rendering, dark mode persistence, loading states, and clipboard support.
- Implemented Express.js REST APIs integrating Groq LLM services for real-time AI-generated educational content.
- Containerized services with Docker and deployed production applications using Vercel and Render.

BigInt Class | C++, STL, Object-Oriented Programming

Fall 2025

- Developed an arbitrary-precision integer library supporting computations beyond built-in numeric limits.
- Implemented operator overloading for arithmetic, comparison, indexing, and stream output functionality.
- Added exception handling and overflow detection for robust error management.
- Optimized recursive computations using memoization to improve execution efficiency.

BattleBot Control System | Arduino, C++, Embedded Systems, RC Control

Spring 2026

- Collaborated in a 5-person team to test embedded control systems for a remote-controlled BattleBot.
- Wired ESCs, RC receiver channels, motors, and Arduino Uno for weapon and drivetrain control.
- Tested Arduino programs for RC pulse reading, PWM motor control, ESC arming, and serial debugging.
- Validated weapon motor activation and wheel movement through RC controller input.

Experience

Marketing Team Intern — Seeknet USA

Summer 2025

- Designed and developed the company's internship landing page using HTML and CSS.
- Created website sitemaps and analyzed client site structures to identify usability improvements.
- Translated Japanese WordPress blog content into English to expand audience reach.
- Assisted with LinkedIn and Instagram marketing campaign planning and content strategy.
